SCP-EasyFiber™

SC Type Fiber Optic Connectors - UPC (standard)
Single Mode & Multimode Distribution Cable

Remove the connector jig

Cleave your fiber strand to 10mm from the 250μm measurement mark

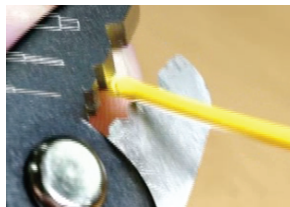

Insert the connector boot and adapter tube onto the cable

Lock the fiber inside the connector by pressing the amber button

Strip the remaining 20mm of buffer from the edge of the jacket using the middle hole on the stripper

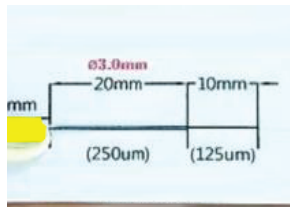

Strip outer jacket about 50mm to reveal 900-micron fibers

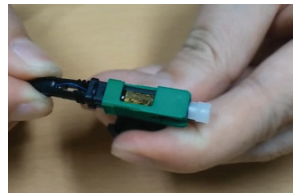

Slide the adapter tube into the connector, then screw the boot onto the connector body and trim any exposed Kevlar yarn

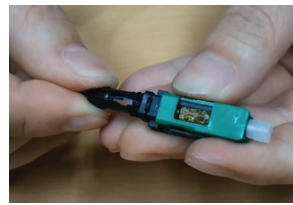

Clean any impurities from your cable using alcohol and a lint-free cloth

Measure from the end of the jacket and make a mark between the 250μm and 125μm section

To remove or re-terminate the connector, simply unscrew the boot and replace the jig

Insert the fiber into the connector body until the strand meets resistance and bows slightly

Strip the buffer to the 250μm mark using the middle hole, then the small hole on the stripper in short increments
