SCP-EasyFiber®

All multimode or single mode fiber cables are not the same. Professional integrators learned this lesson with Category LAN cables. Well, the same is true with fiber cables. Not understanding that the cable characteristics must match the type of installation can be a fatal installation mistake. Bringing fiber into a home or building requires careful consideration on your cable choice. In our targeted market segments, fiber cables are typically installed by low voltage integrators that also install copper cables. As such, the fiber cable you need must support their installation practices, including:
• Must install "like copper" to lower installation labor costs.
• Must be able to bend "like copper" while maintaining full performance characteristics.
• Must be robust enough to handle more aggressive installation, and
• Must be able to terminate as quickly as an RJ45.

Automation, Lighting and Control Cables

Structured Cable Products ("SCP"), Fort Lauderdale, USA, is a leading manufacturer and global supplier of low voltage cables and connectivity accessories. Simply45®

Simply45® is the leading brand for RJ45 modular plug innovation and performance solutions. Our RJ45 solutions are so innovative that we have patents filed on many of our product features.Simply45® provides solutions for both Pass-Through RJ45 Modular Plugs and Standard WE/SS (8P8C) RJ45 Modular Plugs. Simply45® understands the importance that both LAN cables and RJ45 modular plugs must work together at the highest levels to support the performance requirements for today's applications.

Keystone Solutions - Copper and Fiber

Keystone modules and panels are the easiest way to manage and change your network connectivity. SCP has developed a full line of Keystone modules and panels for both copper and fiber networking. All of our Keystone Jacks and Couplers fit into standard and high density keystone ports. Our Keystone Solutions are more cost effective and provide easy integration for all of your copper and fiber networking needs.

Keystone Jacks & Couplers - Copper and Fiber

Features	Compliance
Both Copper and Fiber solutions. Narrow design for easy side by side mounting with no wasted ports. Innovative tool-less jacks are fast, easy to use, and improves performance over IDC type panels. Easily integrate copper and fiber in the same patch panel or wall outlet.	ANSI/TIA 568.2-D, ISO/IEC 11801; TIA 1096A; UL94 V0; PoE IEEE 802.3bt; HDBaseT; RoHS

Connectivity - Fiber

SCP is not just about providing products. We are about providing solutions. Instead of trying to be all things to all people, we have streamlined our fiber solutions to better support the needs of our distribution partners. Our fiber program primarily focuses on infrastructure cables and connectivity solutions that you need for LAN/Networking, AV & Digital Signage, Security, and Multi-Dwelling Units (MDUs). Our fiber solutions start where the Telecom/CATV provider service points end at the building exterior.

SCP-EasyFiber® Field Installable Mechanical Connectors

Features

SCP-EasyFiber® Field Installable Connectors are used to terminate optical fiber cable without all the fuss. Field Installable means that the termination can easily be done at the jobsite. For LAN, AV, MDU, FFTH/FFTD and most other applications, high quality mechanical connectors are usually the preferred choice by integrators as they have lower initial investment costs; and are faster/easier to terminate in the field. SCP-EasyFiber® Premium Connectors outperform most other Field Installable Connectors. These are professional level, premium performance connectors with very low terminated signal loss and reflection; comparable to fusion splice connections. These connectors provide fast terminations comparable to RJ45 termination time.
