Quality Installations Deserve Quality Products

25 Year Certified Connectivity System Limited Warranty

To ensure that today's structured cable installations perform to the highest industry standards, Structured Cable Products Inc ("SCP") offers our 25 Year Certified Connectivity System Limited Warranty. Structured cabling is the backbone of all networking systems. A properly designed system using high quality components is necessary to support system performance both today and tomorrow.

The SCP 25 Year Certified Connectivity System Limited Warranty is exclusively available for projects properly designed and installed by SCP Certified Installers in Horizontal and Backbone systems using SCP branded cabling and SCP branded or Simply45™ branded passive components.

We know that if you use SCP branded cables & SCP or Simply45 passive components with best practice system design/installation, your infrastructure system will provide trouble free performance for many years to come. We feel so strongly about the quality of our product lines that our 25 Year Certified Connectivity System Limited Warranty covers free replacement and labor for any SCP LAN cable and SCP or Simply45 branded passive component that fails during the life of the warranty on systems installed by SCP Certified Installers and with systems registered with SCP.

SCP 25 Year Certified Connectivity System Limited Warranty Overview

All eligible installations that meet the SCP 25 Year Certified Connectivity System Program requirements are warranted as follows:

1. That all SCP branded cable used in the structured cabling system will be free of defects in material and workmanship under normal handling and use;
2. That all passive components used in the structured cabling system branded either by SCP or Simply45 will be free of defects in material and workmanship under normal handling and use;
3. That each registered horizontal link and/or channel for a length of up to 90m for a permanent link and up to 100m for a channel configuration will meet or exceed performance requirements for which it was intended according to ANSI/TIA/EIA, ISO/IEC, and BICSI standards in effect at time of installation for the installed components listed on the warranty certificate.
4. That each registered horizontal link and/or channel will support all current network applications designed to be run on the designated horizontal link and/or channel classification for a length of up to 90m for a permanent link and up to 100m for a channel configuration according to ANSI/TIA 568, ISO/IEC 11801, and BICSI standards in effect at time of installation for the installed components listed on the warranty certificate.
5. If an installed cable or passive component covered by this warranty fails during the warranty period, SCP through our local Authorized SCP Distributor and the original SCP Certified Installer will repair or replace the failed component, including labor, at no cost to the original registered owner of the system.

Notwithstanding the terms of the SCP 25 Year Certified Connectivity System Limited Warranty, the SCP and Simply45 standard limited warranties also provide coverage against defects in materials or workmanship from date of purchase.
