## STATEMENT OF REACH COMPLIANCE

Dear Valued Customer:

This letter provides the compliance status of Structured Cable Products, Inc. ("SCP") products with the following directive(s) or regulation(s):

### **Product/Article Declaration**

REACH (EC 1907/2006)  
Candidate List of 209 Substances of Very High Concern

The acronym "REACH" stands for the "Registration, Evaluation, Authorization and Restriction of Chemicals". REACH is a European Union Regulation (No 1907/2006) which was entered into effect in June 2007. REACH is intended to improve the protection of human health and the environment through the identification and use of certain chemicals and chemical substances.

REACH requires suppliers to inform recipients if their products contain a Substance of Very High Concern (SVHC) in excess of 0.1% by weight. The compliance status of SCP's products was confirmed based on the latest 209 substances as updated by ECHA on June 25, 2020. Please refer to the following ECHA list for the most current candidate list of substances: <http://echa.europa.eu/candidate-list-table>.

To the best of our knowledge, SCP products are not intentionally manufactured or formulated with substances exceeding the above threshold.

Compliance is determined from information and sources which SCP believes are reliable and from random sample testing of the above or similar products by outside accredited testing laboratories. The provided material content data, if applicable, is not to be considered a warranty or quality specification. Product users are responsible for determining the applicability of REACH regulations based on their individual usage of the final product.

### **Independent Testing for REACH Compliance**

Testing of each SCP product is not feasible nor is it practical. Providing test data or material declarations to prove compliance is not required in the legislation enacted by the EU Directive. SCP or SCP representatives have submitted samples of product families for independent compliance testing. Testing will continue on a random basis to verify ongoing compliance. Suppliers have been asked to supply evidence of compliance for materials purchased by SCP on a periodic basis to ensure ongoing compliance.

Should you have further questions, please do not hesitate to contact us.

Sincerely,

Andrew Restivo  
International Sales Director
