# Certified Network Installer Program

To ensure that today's structured cable installations perform to the highest possible industry standards we recommend that consultants and project designers recommend the use of SCP Certified Installers. Through our global distribution partners, SCP is establishing a network of certified contractors. These contractors are recommended by our SCP distribution partners for their professionalism and commitment to implementing best industry practices for their networking installations.

Only SCP Certified Installers are authorized to offer SCP's 25 Year Certified Connectivity System Limited Warranty.

## Installer Requirements

- Must participate in their SCP Authorized Distributor training programs
- Must maintain current credentials with BICSI, CEDIA, HDBaseT, or other comparable services
- Must be recommended for certification by their SCP Authorized Distributor
- Must demonstrate and adhere to industry best installation practices for BICSI, ANSI/TIA, ISO/IEC, and the Commercial Building Telecommunications Cabling Standards.

## Benefits of SCP Certification

- Ability to offer Structured Cable Products Inc 25 Year Certified Connectivity System Limited Warranty
- Membership in SCP's Global Authorized Dealer Network
- Receive project assistance from their SCP Authorized Distributor
- Receive SCP Certified Installer Certificate
- Best pricing guarantee from your SCP Authorized Distributor

For integrators wanting to become a SCP Certified Installer, please contact your local Authorized SCP Distributor or email us at [warranties@scpcat5e.com](mailto:warranties@scpcat5e.com)
