

HOW TO REPLACE THE BLADE (SIMPLY45-CRIMPER-BLADES) ON THE SIMPLY45-CRIMPER?

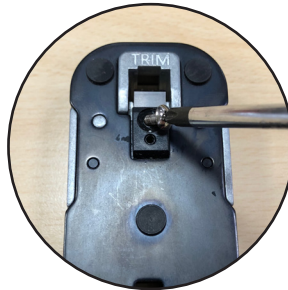

STEP 1

Tools Required:
- Phillips screwdriver
- Flat head screwdriver

STEP 2

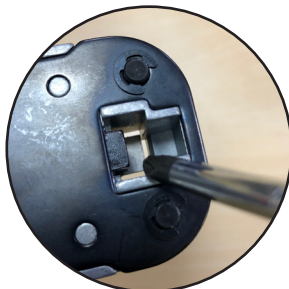

Loosen the screw of the trimming blade.

STEP 3

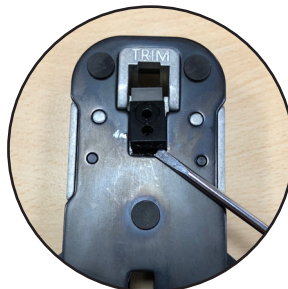

Take off the screw, and put it aside.

STEP 4

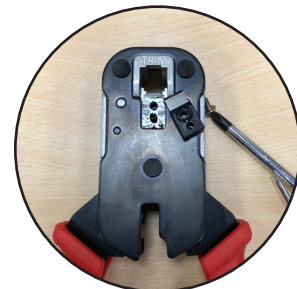

Turn to the other side of the tool, take the tool up, and use the front end of the screwdriver to knock the trimming blade a couple times, so the trimming blade could come off the tool a little bit.

STEP 5

Turn to the original side of the tool, use the flathead screwdriver to force the trimming blade to come off completely.

STEP 6

Place the new blade onto the crimper, and use the Phillips screwdriver to tighten it.
